at work. A: Data sets stored in Amazon S3 are permanently deleted after 24 hours. This is the same as the retention setting for data sets stored in the Amazon Redshift database. If you want to use AWS S3 data you'll need to make sure you are using S3 storage with the appropriate retention setting, or you'll need to reprocess the data. For a preview of the S3 pricing, see here: Let's talk. Tanya: First and foremost, thanks for taking the time to discuss your work and project. I have attached the email that we sent to Ken Lay last week outlining Enron's interest in a partnership with GE for the development of fuel cells. I've also attached the news release about the announcement this week. I know this is a little late, but please let me know if there is anything you need from me. Happy Thanksgiving!

Shirley Shirley Crenshaw 713-853-5290 Tanya Burke on 11/23/2000 12:58:52 PM To: "klay@enron.com" cc: Shirley Crenshaw Subject: FW: Fuel Cell Partnership Mr. Lay: ? I have attached two documents that were recently sent to Ken Lay. ? These documents outline Enron's interest in partnering with GE for the development of fuel cells. ? Enron has an interest in fuel cells because of their potential as both a complementary technology for use in the Enron Power Generation business and as a product offering in the electricity markets. ? We are also interested in getting to know GE better and in helping GE to understand our particular needs. We look forward to your response. Thank you, Tanya - enron fuel cells.doc - enron announcement.docCheck out our new site Makeup 82157476af
